

Abhinav Kumar Yadav

Full Stack Developer — B.Tech CSE — IIIT Senapati, Manipur
abhinavyaduvanshi05@gmail.com — [LinkedIn](#) — [GitHub](#) — 📞 9336158912

Professional Summary

Full Stack Developer skilled in MERN, Node.js/Express, and MongoDB, building scalable APIs and optimizing backend performance. Experienced in integrating ML-driven features (Thompson Sampling, UCB) to enhance system intelligence. Solved 400+ DSA problems in C++; deployed production apps on Render with Cloudinary.

Education

Indian Institute of Information Technology, Manipur
B.Tech in Computer Science and Engineering

Nov 2022 - June 2026
Current CPI: 8.25/10.0

Technical & Interpersonal Skills

- **Languages:** C, C++, JavaScript, Python
- **Frontend:** HTML, CSS, React.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, MongoDB Atlas, SQL
- **AI/ML:** NLP, Document Processing,
- **Tools:** Git, GitHub, Ubuntu, VS Code, Cloudinary
- **Concepts:** REST APIs, OOPs, DSA, DBMS, OS, Computer Networks
- **Soft Skills:** Communication, Leadership, Adaptability, Collaboration

Experience

Software Development Intern: ChargeFlow Dashboard Project, Zenix Automotive Jan 2026 – Apr 2026
Zenix Automotive Pvt. Ltd.

- Engineered critical visualization modules and optimized RESTful API integrations for the ChargeFlow_dashboard platform, reducing data latency by 35% and boosting dashboard rendering speed by 40%.
- Refactored state management architectures to deploy highly scalable code, earning the Best Intern award out of the cohort for exceptional technical execution and cross-functional collaboration.

Research Intern: Reinforcement Learning Project, IIT BHU May 2025 – July 2025
Indian Institute of Technology (BHU), Varanasi

- Developed a custom replay simulator and tuned Policy Gradient, UCB, and Thompson Sampling algorithms, increasing experiment reproducibility by 50% and convergence speed by 30%.
- Built a high-accuracy movie recommender system and integrated comprehensive analytical plots, improving overall recommendation relevance by over 35%.

Projects

Wanderlust Loop | EJS, Node.js, Express, MongoDB, Cloudinary, ML February 2025

- Shipped a production-ready travel discovery platform on Render using EJS, optimizing REST APIs and MongoDB to cut latency by 35% and load times by 40%.
- Integrated secure authentication, Cloudinary workflows, and a Thompson Sampling ML pipeline that boosted repeat sessions by 28%.

Veni Vidi Disceres | Node.js, Express.js, MongoDB, Python, AI/ML 2025

- Integrated Node.js backend with a Python AI pipeline for text extraction and semantic Q&A, achieving 85% relevant response accuracy.
- Designed a scalable architecture using Multer, MongoDB, and async APIs, reducing API response time by 40% with a responsive UI.

Certifications & Technical Achievements

Full Stack Web Development Certification Apna College
Developed MERN stack projects, implemented user authentication, and built RESTful APIs. Fast and adaptive.

C++ DSA Certification Apna College
Proficient in data structures and algorithms, problem-solving, team leadership, and collaborative execution.
